

Yunus Emre Durak

Software Engineer | Cyber Security Researcher

Address: İzmir, Bornova 35090, Turkey | **Phone:** +90 543 230 54 36

E-mail: yunusemre.durak@icloud.com | **Web:** yunusemredurak.com.tr

Summary

I am a graduated Software Engineer. Starting in high school, I developed a strong passion for software that later grew into cyber security. I completed my education in English and have continued to strengthen both my technical and language skills through internships and professional experience in backend development, information security, and AI. Combined with a focus on continuous improvement and a genuine enthusiasm for teamwork, this background has prepared me to contribute in software engineering. My goal is to create innovative and impactful solutions, both independently and as part of a team.

Skills

Technical Skills

Java, C/C++/C#, HTML/CSS/JavaScript, API Design
Linux System Management, SIEM Tools
Vulnerability Assessment, Red Team-
ing/Pentesting

Soft & Other Skills

Software Development, AI Training
Analytical Thinking, Problem Solving
Teamwork and Collaboration

Experience

xAI AI Tutor

January 2026 – July 2026

xAI

- Gained hands-on experience in the development and training of large language models (LLMs) through direct interaction with cutting-edge AI systems.
- Deepened understanding of Retrieval-Augmented Generation (RAG) architectures and their application in enhancing model accuracy and contextual relevance.
- Provided high-quality feedback, annotations, and prompt engineering to improve model performance and alignment with user expectations.
- Collaborated with AI research teams to identify model limitations and contributed to iterative improvements in model capabilities.
- Developed evaluation frameworks and test cases to assess AI model outputs for correctness, helpfulness, and safety.

Software Engineering Intern

June 2025 – September 2025

Tostbang Technology, Diyarbakır, Turkey

- Supported the development of corporate projects as part of the backend team.
- Contributed to API development, database design, and performance optimization.
- Participated in code reviews and applied software development standards.
- Improved teamwork and collaboration skills through active involvement in project workflows.

IT ERP Support

June 2021 – August 2021

EFG Energy Electricity Ve Transformer Co. Ltd., Diyarbakır

- Provided a detailed description of network components such as switches, hubs, routers, modems, and firewalls, ensuring the healthy functioning of the company's network infrastructure.
- Analyzed communication between devices within the network, provided recommendations to enhance efficiency, and optimized network performance with solutions developed.
- Digitized physical security measures through work on camera security systems, strengthening the company's security infrastructure.
- Proposed improvement suggestions for existing systems based on research findings, minimizing security vulnerabilities and developing protection strategies for company assets.
- Addressed issues with employees' computers and other devices, delivering quick and effective solutions.
- Provided technical support to resolve problems arising in computer hardware and software, thereby increasing employee productivity.
- Learned the C programming language in spare time, enhancing knowledge and skills in this field.
- Leveraged C programming skills to expand understanding of software development and effectively applied this knowledge to company projects.

Information Security Intern

June 2020 – August 2020

Normsight Cyber Security, Diyarbakır

- Conducted comprehensive security audits and implemented preventive measures for the confidentiality of customer data and the security of payment processes in e-commerce sites.
- Organized and improved security protocols on e-commerce sites to ensure compliance with industry security standards.
- Conducted detailed vulnerability research on WordPress themes and plugins, identifying critical security vulnerabilities to enhance the overall security of the platform.
- Optimized the security of WordPress sites with developed solutions, providing protection against potential attacks leveraging specialized expertise in security.

Jr. Front-End Developer

June 2019 – August 2019

3KCREATIVE, Diyarbakır

- Developed professionally in HTML, CSS, and JavaScript, creating user-friendly and aesthetically pleasing web pages.
- Gained experience in customizing WordPress themes, enhancing their visual design to improve the user experience.
- Played an active role in identifying and mitigating security risks in projects through research in web security.
- Enhanced site security and formulated protection strategies through developed solutions with a security-focused mindset.
- Efficiently managed team dynamics in projects through strong commitment to teamwork and effective communication skills.
- Successfully contributed to the completion of various projects by collaborating within the team, leveraging diverse perspectives, and sharing responsibilities.

Education

Associate of Science in Software Engineering (English)

September 2021 - July 2026

Yaşar University, İzmir

Vali Aydın Arslan Science High School

September 2017 - May 2021

Turkey, Diyarbakır
